

Congratulations for successfully completing the Workplace Hazardous Materials Information System (WHMIS) Training Course.

About Workplace Specific Training

While this training course has armed you with a great amount of knowledge and skills to protect yourself and others while working with or around hazardous materials, there may be additional information and training that you require in order to fully protect yourself from specific hazards that exist within your workplace.

Your employer is required to evaluate and determine if additional workplace specific training is required, and further, ensure that you receive said training prior to being exposed to any hazards that could potential result in you becoming injured or ill. *There is an optional space on the card below for workplace specific training information.*

Additional Information

Your wallet card displays additional information on its reverse side regarding specific training topics that were covered within this training course. Additionally, it contains a space where your employer can confirm that you've received any workplace specific (onsite) information and training.

Expiration Date

It is an employer's responsibility to determine how often workers receive WHMIS training, therefore this training certificate does not display an expiration date. It does, however, contain a space for an expiration date that employers can complete based on their specific training requirements.
